EDUCATION

Dayananda Sagar College of Engineering

Bachelor of Engineering in Computer Science; GPA: 8.75

Bangalore, India

July 2024 – Present

SKILLS SUMMARY

- **Languages:** Python, Golang, TypeScript
- **Libraries/Frameworks:** Gin, Next.js, Flask, Django
- **Databases/Tools:** Git, Github Actions, PostgreSQL, MongoDB
- **Platforms:** Linux, Windows

EXPERIENCE

Seeqlo

Full-Stack Developer: React, JavaScript, Firebase

Remote

Aug 2025 - Present

- **Token-Based Credit System:** Implemented a credit system utilizing a **token usage** model to manage **user access** and **resource allocation**.
- **Codebase Refactoring:** Enhanced code maintainability and scalability by refactoring **monolithic** files into **modular, reusable components**.
- **Community Administration Module:** Developed a dedicated interface for community **admins** to **monitor** user activity and **manage** platform content.

Ignito Co.

Full-Stack Developer: Golang, NextJS, MongoDB, Supabase

Remote

July 2025 – Aug 2025

- **Inventory Management System:** Developed an inventory management system using **Next.js** and **Supabase** to process and store large Excel datasets.
- **Optimized the data pipeline:** Reduced file processing time from **7 minutes to 16 seconds**.
- **PO Tracking Application:** Built a **full-stack** application to **manage** and **track** lifecycle of purchase bills, purchase orders (POs), In and Out Entries.
- **API Development/Backend:** Developed RESTful APIs with **Golang (Gin)** to handle CRUD operations, utilized **MongoDB** for data storage.

Kharagpur Winter of Code

Contributor at Eventica: Javascript, CSS, HTML

Remote

Nov 2024 – Feb 2025

- **Responsive UI/UX Development:** Implemented **responsiveness** and **compatibility** across all devices, fixed **inconsistencies** in **theme-switching** feature.

PROJECTS

LiquidPay

All-in-one banking and finance dashboard

 LiquidPay

- : Built a website to track transactions and classify spending as **needs** vs. **wants**.
- : Suggested expenditure-**reduction** goals and integrated a **reward coin** system.
- : Tech Stack: *Next.js, JavaScript, TensorFlow, Gemini API*

Career Portal

Centralized opportunity board for students

 Career-Portal

- : Deployed a platform for listing student opportunities with **admin dashboard** to manage posts.
- : Tech Stack: *Flask, HTML, CSS, MongoDB*

VendIN

Vendor discovery and visibility platform

 VendIN

- : Enabled users to explore hidden **vendors**, unique events, and local hotspots.
- : Combined a **Django** backend with an interactive frontend using JavaScript.
- : Tech Stack: *Django, HTML, CSS, JavaScript, SQLite*

ACHIEVEMENTS

- Recipient of the **LiFT Scholarship** awarded by The Linux Foundation - June 2025
- Won Coding Relay held at Dayananda Sagar College of Engineering – March 2025
- Ranked Top 9 out of 63 teams in HackOasis V2 Hackathon – November 2024

VOLUNTEER EXPERIENCE

Member, PointBlank

A community focused on developing industry-ready engineers and well-rounded individuals.

Bangalore, India

Dec 2024 – Present

- **PointBlank Website:** Maintained and enhanced the PointBlank Website and Careers page.
- **Backend & API Development:** Integrated **Swagger documentation**, fixed **Cloudinary** related issues.
- **Github Actions:** Fixed **GitHub Actions** build and labeller failures, **automated** database backups with **cron job**.
- **Tech Stack:** *NextJS, Typescript, MongoDB, Cloudinary*
